

## Press Release

### Charolles Unveils Its New Collection at Maison & Objet in Paris

Paris, France - September 8, 2024 – Manufacture de Charolles, renowned for its exceptional craftsmanship in artisanal ceramics, is proud to announce the launch of its new collection, celebrating the art of handcrafted ceramics and contemporary design.

This collection features three standout creations, each designed to enhance living spaces with elegance and originality.

#### Collection of Handmade Ceramic Candles

For the first time, Manufacture de Charolles reveals its new handmade ceramic candles, crafted with a unique attention to detail. The natural sunflower wax, chosen for its eco-friendly and sustainable properties, is available in three delicate fragrances. These candles, housed in ceramic containers with clean lines, embody the perfect union of craftsmanship and well-being, adding a refined and sensory touch to any interior.

**Vertige Vase - By Adolfo Abejón**

Created by internationally renowned designer Adolfo Abejon, the Vertige Vase is a bold and innovative work of art, manufactured at our Charolles facility. With its sculptural design and ability to transform the perception of flowers, this vase offers a new aesthetic approach. Designed to intrigue and fascinate, the Vertige Vase represents the perfect blend of contemporary creativity and artisanal tradition.

The Vertige Vase showcases a true technical and artistic feat. It is distinguished by its complex assembly of three distinct earthenware pieces, each precisely shaped to fit together perfectly and form a harmonious structure.

**A New Range of Lighting Fixtures:**

- Tandem Mini Table Lamp

Adapted from our renowned Tandem range, the Tandem Mini is a table lamp designed for compact spaces such as desks or nightstands. Its modern and minimalist design, consisting of two earthenware pieces (a lampshade and a base), creates a visual harmony that evokes warmth and sophistication. Manufactured in our Charolles workshop, this lamp illustrates traditional craftsmanship serving contemporary design.

- COL Mini Table Lamp – By Aurélie Richard

Born from designer Aurélie Richard's imagination, the COL Mini lamp is an elegant and compact version of our iconic COL floor lamp. Designed to fit perfectly into small spaces, its dimensions of 260 mm in height and 145 mm in diameter are complemented by a minimalist design that emits a soft and soothing light. Each piece is meticulously crafted in our Charolles workshop, continuing our commitment to exceptional craftsmanship.

- TOTEM Table Lamp – By Aurélie Richard

The TOTEM is a lamp with a refined and contemporary design, perfect for illuminating a sideboard or dresser. Designed by Aurélie Richard, this lamp stands out with its earthenware base, available in various colors, which skillfully combines a matte and glossy finish for an elegant and sophisticated visual effect. Its linen lampshade rests on a visible metal frame, adding a unique and bold touch. This feature gives the TOTEM lamp a strong identity, where the structure itself becomes a decorative element.

*With this new line of iconic lighting fixtures, including the Tandem Mini, COL Mini, and TOTEM lamp, Manufacture de Charolles continues its commitment to artisanal innovation and exceptional design.*
